

CEQG Errata - December 2007

Canadian Water Quality Guidelines for the Protection of Aquatic Life - Summary Table, Update 7.1

Methoprene was accidentally omitted from the table.

CEQG Errata - January 2007 Corrected in Update 7.0

Canadian Water Quality Guidelines for the Protection of Aquatic Life - Summary Table, Update 6.0

The footnotes for nitrate and nitrite on page 5 of the summary table are incorrect. Footnote y should refer to both the freshwater and marine values for nitrate, and footnote z should refer to the guideline for nitrite in freshwater.

CEQG Erratum November 2006 Corrected in Update 6.0

Canadian Soil Quality Guidelines for the Protection of Environmental and Human Health - Summary Tables, Update 6.0

In Table 2 (Interim remediation criteria) the referenced footnotes that are supposed to list the substances in the applicable substance classes are missing.

CEQG Erratum March 2006 Corrected in Update 6.0

Canadian Soil Quality Guidelines for the Protection of Environmental and Human Health - Summary Tables

Update 5.0 CD had an incorrect earlier version of the soil quality guidelines (Chapter 7) summary tables.

CEQG Errata - January 2006 Corrected in Update 6.0

Xylenes

Chapter 7: Canadian Soil Quality Guidelines for the Protection of Environmental and Human Health (English fact sheet): Tables 1, 2a and 2b.

The values for the Soil Contact Guidelines and SQG_E (Soil Quality Guideline for Environmental Health) for fine surface soils on agricultural/residential and commercial/industrial lands are incorrectly stated as 55mg/kg and 210 mg/kg. The correct values are 65mg/kg and 230 mg/kg, respectively. The values for the Soil Contact Guideline and SQG_E for fine subsurface soils on agricultural/residential and commercial/industrial lands are incorrectly stated as 110mg/kg and 420 mg/kg. The correct values are 130mg/kg and 460 mg/kg, respectively. These corrections do not affect the integrated overall Soil Quality for Xylenes.

Didecyl dimethyl ammonium chloride (DDAC)

Chapter 4: Canadian Water Quality Guidelines for the Protection of Aquatic Life

The Chemical Abstracts Service Registry (CAS) number for didecyl dimethyl ammonium chloride (DDAC) is incorrectly stated as 7179-51-5. The correct CAS number is 7173-51-5.

CEQG Erratum - February 2004 Corrected in Update 4.0

Polychlorinated Dibenzo-p-Dioxins and Polychlorinated Dibenzofurans (PCDD/Fs)

Chapter 6: Canadian Sediment Quality Guidelines for the Protection of Aquatic Life: Table 2. Chlorine substitution and toxic equivalency factors (TEFs) for selected PCDD and PCDF congeners (Environment Canada 2000). The value for 2, 3, 4, 7, 8-PCDF is incorrectly stated as 0.05. The correct value is 0.5.

CEQG Errata - July 2003 Corrected in Update 3.2

Barium

Chapter 7: Canadian Soil Quality Guidelines for the Protection of Environmental and Human Health Table 2. "Industrial Land Use". The two values for off-site migration check of 39 mg/kg and 140 mg/kg were introduced in error and must be replaced with "NC" (not calculated).

CEQG Erratum - March 2003 Corrected in Update 3.1

Inorganic Fluorides

Chapter 4: Canadian Water Quality Guidelines for the Protection of Aquatic Life. The value for the Canadian Water Quality Guidelines for the Protection of Aquatic Life for Inorganic Fluorides is 0.12 milligram per Litre (0.12 mg/L). The value is correctly stated in the fact sheet, but is incorrectly stated as 0.12 microgram/L in the tables "Summary of Existing Canadian Environmental Quality Guidelines" and "Summary Table" (Chapter 4).
